Dear HR Manager,

I am writing to express my interest in a position related to Computer Science and Engineering at your esteemed organization. I have recently completed my B.Tech in Computer Science and Engineering from D.Y. Patil College of Engineering, Kolhapur, and am eager to begin my professional career with a company known for its innovation and impact in the technology industry.

Throughout my academic career, I have developed a strong technical foundation in programming languages such as C, C++, Java, and Python. I have also worked on projects involving database systems, web technologies, and problem-solving through algorithms and data structures. My final year project focused on [briefly describe your project, e.g., "developing a smart attendance system using facial recognition"], which gave me hands-on experience in applying theoretical knowledge to real-world problems.

In addition to technical skills, I have gained teamwork, communication, and time management abilities through participation in college-level hackathons, seminars, and group assignments. I am passionate about learning new technologies and continuously improving my skill set to contribute effectively to any project I am involved in.

I am confident that my academic background, technical skills, and enthusiasm make me a suitable candidate for a role in your organization. I have attached my resume for your review. I would be grateful for the opportunity to further discuss how I can contribute to your team.

Thank you for your time and consideration.

Sincerely,

SNEHAL TANAJI KHOT
